

TONY VERDI

Dj and producer from Barcelona, recognized as one of the forerunners of the Spanish electronic scene since 1986.

He began his career as resident dj of the legendary Verdi room and during these last 30 years he has managed to remain as one of the main references for each generation.

Always one step ahead, he was the first to mix electronics with guitars, adapting in each moment the new tendencies to a style that they have made and that makes it unique and different.

Investigating and reinventing music has been paramount throughout all these years and has accompanied from the beginning the dj sets with rhythm machines, sequencers and synthesizers that have turned many of their sessions into real live shows.

He is currently focused on the production of his songs, either on his own label Time Trial Records, or on other labels of the scene, remixing other artists, as well as teaching electronic music production at the prestigious SAE institute school from Barcelona.

Unnecessary for an artist of the caliber of Tony Verdi is to name all the great DJs with whom he has shared the booth, all the Clubs he has gone through or the prizes and recognitions received throughout these more 30 years as professional.
